

Developer I

Basic Function:

You love technology and solving complex problems. While working at the command line you feel a draw to work with people. A mix of phone conversations, email communications, and solving technical issues all equal your ideal work environment. You have excellent time-management skills and are motivated to get results.

Core responsibilities for the position are as follows:

- Work closely with internal developers to create/maintain tools for internal company use
- Build custom websites and web applications for customers
- Assist in creating scripts inside our management tools
- Assist with documentation
- Willingness to learn new technologies
- Desire to work in the MSP space

Key Skills:

- - Web Programming (HTML, CSS, Javascript)
- - Backend Web Development (PHP, Python)
- - Database Development/Management (MySQL/MariaDB, MSSQL)
- - Basic Web Server Technologies (IIS, Apache)
- - Basic Windows Server Experience
- - Basic Networking Knowledge

Bonus Skills:

- Node.js Experience
- Additional programming languages (C#, etc.)
- Powershell Experience
- Linux Servers Experience
- Server Hardware Experience

Each employee of Liberty Technology has a specialized position within the company; however, we all work together as a team to meet the common goal: to achieve the highest level of customer service through communication and technical skill.

You must be:

- Fun to be around
- A team player
- Detail-oriented
- Results-driven
