# Cloud Solutions

Cloud services encompasses various technologies and is often hard to explain. At Liberty Technology, we like to make cloud solutions simple.

We offer professional consulting and implementation of cloud solutions that are specified to your business needs.

## The Basics

### What is 'the cloud'?

The cloud is a collection of interconnected IT services and infrastructures that are accessible via a network. From a user's point of view, anything that backs up and syncs data that is accessible on multiple devices can be said to be a cloud service.

### Where is 'the cloud'?

The cloud is real, and nothing like a cloud. It lives primarily in wealthy, cooler parts of the world, far away from floodplains and even flight-paths. Stored in office blocks or warehouses, the world's major data storage centers are primarily in the US and Europe, though there's growth in Asia and Australia.

### Why use 'the cloud'?

Clouds can provide users with a number of different benefits.

- reduction of costs
- universal access
- up-to-date software
- choice of applications
- more economical
- flexibility
- backup and protection

# Our Cloud Services

## 8 Key Cloud Solutions

### cloud backup

Important data backups pushed offsite to a cloud server provides protection from natural disasters and theft. No special equipment required. Simple data recovery.

### hosted email

Email hosted on a cloud server, outside of your office. It is secure, reliable, and accessible from anywhere. You get the latest updates and built in management with no upfront hardware purchasing.

### email archiving & continuity

Cloud email continuity gives you the ability to send and receive emails even when your server is down so you can still maintain normal business operations.

### cloud applications

Create word processing, spreadsheets, and presentations online with no special software. Collaborate real-time with your colleagues and access documents from any device, any time.

### email protection

Reading through spam mail is a huge waste of time and could be potentially harmful to your machine. Increase productivity for email users and filter out viruses by using email protection.

### cloud voice over IP

Cloud voice over IP is a full-featured phone system managed by a provider connected to the Internet. It allows small businesses to get full-featured, managed phone systems for a small monthly fee.

### domain management

Avoid the hassle of registering and maintaining domain records. Keep it simple by using our domain management cloud solution.

### web protection

Help reduce or eliminate virus and malware on your computer and network. Website filtering offers protection from online threats.

### Comprehensive list:

- Cloud Backup
- Cloud Infrastructure
- Cloud PBX
- Cloud File Servers
- Cloud Voice over IP
- Domain Names
- Email Encryption
- Email Protection
- Email Archiving/Continuity
- Hosted Email
- Hosted Collaboration
- Hybrid Cloud File Server
- Infrastructure as a Service
- Telepresence
- Web Protection
- Virtual Meetings
