# Infrastructure Solutions

IT infrastructure refers to the hardware, software, network resources and services required for the existence, operation and management of an enterprise IT environment.

## Let us help you get the most out of IT.

At Liberty Technology we partner with top-of-the-line companies to bring to you the best of the best infrastructure solutions. Regardless of whether you're currently using any cloud services, you still need infrastructure. Infrastructure allows your organization to deliver IT solutions and services to employees, partners and/or customers.

## We partner with the very best.

Cisco Prime Infrastructure empowers IT departments to more effectively manage their networks and the services they deliver. This scalable, integrated solution tightly couples end-user awareness and application performance visibility with comprehensive lifecycle management of wired and wireless access, campus and branch networks.

Lenovo's complete line of ThinkServers meet a wide range of functionality, performance and space demands.

VMware Infrastructure is the most widely deployed software suite for optimizing and managing industry-standard IT environments through virtualization – from the desktop to the data center. The only production-ready virtualization software suite, VMware Infrastructure is proven to deliver results and is issued in a wide variety of environments and applications.

Capture the benefits of cloud computing with an infrastructure optimized for virtualization and cloud. With EMC, your cloud can deliver unsurpassed storage, backup, security, and anywhere access.

Microsoft Exchange and Active Directory are the industry leaders in email and directory services. Active Directory's main purpose is to provide central authentication and authorization services for Windows-based computers. Active Directory networks can vary from a small installation with a few hundred objects to a large installation with millions of objects.

APC's InfraStruxure™ fully integrates power, cooling, racks, security, and management components, plus services for a complete data center solution. InfraStruxure™ is the scalable and adaptable data center IT room architecture that dramatically reduces time and complexity from concept and design through installation.

Whether you're a small business or large enterprise, Nimble Storage delivers the right mix of performance and capacity your applications need, at a price you can afford. Engineered for efficiency, Nimble Storage allows you to consolidate storage for multiple workloads onto a single array. Fast and efficient backup/restore and replication functionality also come standard.

Tech Data Corporation is one of the world's largest wholesale distributors of technology products, services and solutions. Its advanced logistics capabilities and value added services enable 115,000 resellers in more than 100 countries to efficiently and cost effectively support the diverse technology needs of end users.

## Our Infrastructure Solutions

### 5 Key Services

#### Collaboration

- Call Control
- IM & Presence
